

Lesson 1

Worksheet 3 — Tasks

1. *Change the Python code so that the project will say the day of the week and then greet you both by name.* Paste the code from your first program below:

2. *Another command you can use in Pytch is: `self.set_size(0.5)`. Try it out by adding it to your project. Try to change the Snake's appearance as the project runs. Paste the code from your second program below:*

Extensions

1. *Can you change the snake so that it looks like something totally different? (You will need to make **two** changes, both on the costumes tab). Say below what you had to do:*
