

## Lesson 6

### Worksheet 1

Here is your Pytch project code:

The screenshot shows the Pytch project editor with two scripts. The first script, titled 'when green flag clicked', contains the following code:

```
1 self.go_to_xy(0, -145)
2 while True:
3     if pytch.key_pressed("ArrowLeft"):
4         if self.x_position > -190:
5             self.change_x(-2)
6
```

Below the code is a preview of a bowl object, labeled 'Bowl', which is a brown bowl on a grey background.

The second script, also titled 'when green flag clicked', contains the following code:

```
1 self.go_to_xy(0, 200)
2 while True:
3     self.change_y(-3)
```

Below the code is a preview of an apple object, labeled 'Apple', which is a red apple on a grey background.

Write out *exactly* what you think will happen when you click the green “Run” button.
